VOLUME 36

January-June
1975

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology, and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Editor

ROBERT M. BERNE, *Charlottesville, Virginia*

Associate Editor

VOLUME 36

January-June 1975

No. 1 (January)

Brief Reviews: A Commentary on Muscle Mechanics. Bernard C. Abbott and Donald G. Gordon	1
Control of Cardiac Sarcolemmal Adenylate Cyclase and Sodium, Potassium-Activated Adenosinetriphosphatase Activities. Michihiko Tada, Madeleine A. Kircherberger, Jo-Anna M. Iorio and Arnold M. Katz	8
Comparison of ⁸⁵Krypton and ¹³³Xenon Cerebral Blood Flow Measurements before, during, and following Focal, Incomplete Ischemia in the Squirrel Monkey. E. Jerome Hanson, Jr., Robert E. Anderson and Thoralf M. Sundt, Jr.	18
Contractility in Mammalian Heart Muscle: Calcium and Osmolality. Mark A. Goethals, Simone M. Adele, and Dirk L. Brutsaert	27
Anoxia-Induced Release of Prostaglandins in Rabbit Isolated Hearts. Alan J. Block, Harold Feinberg, Krystyna Herbaczynska-Cedro and John R. Vane	34
Motion of the Tricuspid Valve Annulus in Anesthetized Intact Dogs. Anastasios G. Tsakiris, Douglas D. Mair, Shuji Seki, Jack L. Titus, and Earl H. Wood	43
Papillary Muscle Shortening in the Intact Dog: A Cineradiographic Study of Tranquilized Dogs in the Upright Position. Arthur F. Grimm, Bessie L. Lendrum and Hun-Lin Lin	49
Intimal Injury and Regrowth in the Rabbit Aorta: Medial Smooth Muscle Cells as a Source of Neointima. Theodore H. Spaet, Michael B. Stemerman, Frank J. Veith, and Ilze Lejnieks	58
Effect of Hemodilution on the Distribution of Renal Blood Flow. Stephen Migdal, Edward A. Alexander, Frank J. Bruns, Arthur L. Riley, and Norman G. Levinsky ..	71
Static and Dynamic Components in the Vascular Myogenic Response to Passive Changes in Length as Revealed by Electrical and Mechanical Recordings from the Rat Portal Vein. Börje Johansson and Stefan Mellander	76
In Vivo Electrophysiological Effects of Lidocaine in Canine Acute Myocardial Infarction. Joel Kupersmith, Elliott M. Antman, and Brian F. Hoffman	84
A Mechanism for the Electrocardiogram Response to Left Ventricular Hypertrophy and Acute Ischemia. Pierre S. Thiry, Reinhardt M. Rosenberg, and Joseph A. Abbott	92
Localization of Heart Vectors Produced by Epicardial Burns and Ectopic Stimuli: Validation of a Dipole Ranging Method. Raymond E. Ideker, Jack P. Bandura, Richard A. Larsen, John W. Cox, Jr., Francis W. Keller, and Daniel A. Brody	105
Prior Receptor Occupancy as a Determinant of the Pressor Activity of Infused Angiotensin II in the Rat. Herbert Thurston and John H. Laragh	113
Increased Plasma Catecholamine Concentrations and Vas Deferens Norepinephrine Biosynthesis in Men with Elevated Blood Pressure. Vincent DeQuattro, Yukio Miura, Arthur Lurvey, Malcolm Cosgrove, and Robert Mendez	118
Time Course for Reversal of Electrophysiological and Ultrastructural Abnormalities in Subendocardial Purkinje Fibers Surviving Extensive Myocardial Infarction in Dogs. Peter L. Friedman, John J. Fenoglio, Jr., and Andrew L. Wit	127
Effect of Alterations of Arterial Blood Pressure and Heart Rate on Segmental Dyskinesia during Acute Myocardial Ischemia and following Coronary Reperfusion. Richard E. Kerber and Francois M. Abboud	145

A Model of Psychosocial Hypertension Showing Reversibility and Progression of Cardiovascular Complications. James P. Henry, Patricia M. Stephens, and George A. Santisteban	156
Hemodynamic Effects of Acute Experimental Aortic Coarction in the Dog. David L. Newman, Robin K. Walesby, and Nelson L. R. Bowden	165
Vascular Endothelium—Leukocyte Interaction: Sticking Shear Force in Venules. Geert W. Schmid-Schoenbein, Yuan-Cheng Fung, and Benjamin W. Zweifach	173
Dobutamine: Development of a New Catecholamine To Selectively Increase Cardiac Contractility. Ronald R. Tuttle and Jack Mills	185
Enhanced Renal Prostaglandin Production in the Dog: I. Effects on Renal Function. Jerome Tannenbaum, Jacek A. Splawinski, John A. Oates, and Alan S. Nies	197
Enhanced Renal Prostaglandin Production in the Dog: II. Effects on Intrarenal Hemodynamics. Lucas C. T. Chang, Jacek A. Splawinski, John A. Oates, and Alan S. Nies	204
Effect of the Thyroid State on the Enzymatic Characteristics of Cardiac Myosin: A Difference in Behavior of Rat and Rabbit Cardiac Myosin. Yoshio Yazaki and Maurice S. Raben	208
Renal Intracortical Blood Flow Distribution, Function, and Sodium Excretion in Unanesthetized Dogs following Vena Caval Ligation. Robert A. Gutman and Robert L. McRae	216
Permeability of Connective Tissue Linings Isolated from Implanted Capsules: Implications for Interstitial Pressure Measurements. Harris J. Granger and Aubrey E. Taylor	222
Pulmonary Parenchymal Tissue Volume Measurements in Graded Degrees of Pulmonary Edema in Dogs. Frederick L. Glauser, Archie F. Wilson, Linn Carothers, Judy Higi, David White, and James Davis	229
Letters to the Editor	236
Instructions to Authors	238
News from the American Heart Association	242

No. 2 (February)

Brief Reviews: Angiotensin I Converting Enzyme. Ervin G. Erdös	247
Arterial Fibrous Proteins in Cynomolgus Monkeys after Atherogenic and Regression Diets. Mark L. Armstrong and Majorie B. Megan	256
Diminished Inotropic Response of Aged Myocardium to Catecholamines. Edward G. Lakatta, Gary Gerstenblith, Charles S. Angell, Nathan W. Shock, and Myron L. Weisfeldt	262
Influence of Carotid Baroreceptors on Vascular Responses to Carotid Chemoreceptor Stimulation in the Dog. Giuseppe Mancia	270
Calculations of Pulsatile Flow through a Branch: Implications for the Hemodynamics of Atherogenesis. Morton H. Friedman, Vivan O'Brien, and Louis W. Ehrlich	277
Functional and Hemodynamic Adaptation to Progressive Renal Ablation. Joel M. Kaufman, Norman J. Siegel, and John P. Hayslett	286
Sphingomyelin and Other Phospholipid Metabolism in the Rabbit Atheromatous and Normal Aorta. Shiv K. Seth and Howard A. I. Newman	294
Malignant Hypertension Resulting from Deoxycorticosterone Acetate and Salt Excess: Role of Renin and Sodium in Vascular Changes. Haralambos Gavras, Hans R. Brunner, John H. Laragh, E. Darracott Vaughan, Jr., Michael Koss, Lucien J. Cote, and Irene Gavras	300

Demonstration that the Atria, Ventricles, and Lungs Each Are Responsible for a Tonic Inhibition of the Vasomotor Center in the Dog. Giuseppe Mancica and David E. Donald	310
Effect of Insulin on the Proliferation of Cultured Primate Arterial Smooth Muscle Cells. Robert W. Stout, Edwin L. Bierman, and Russell Ross	319
Red Cell Carriage of Label: Its Limiting Effect on the Exchange of Materials in the Liver. Carl A. Goresky, Glen G. Bach, and Brita E. Nadeau	328
Red Cell Permeability Effect on the Mean Transit Time of an Indicator Transported through an Organ by Red Cells and Plasma. William Perl	352
Letters to the Editor	358
News from the American Heart Association	360

No. 3 (March)

Brief Reviews: Mitochondria and Cardiac Hypertrophy. Murray Rabinowitz and Radovan Zak	367
Manganese and Electrogenic Phenomena in Canine Purkinje Fibers. Perry M. Hogan and Kenneth W. Spitzer	377
Dissociations between Changes in Myocardial Cyclic Adenosine Monophosphate and Contractility. Philip D. Henry, James G. Dobson, Jr., and Burton E. Sobel	392
Catecholamine-Dependent Cyclic Adenosine Monophosphate and Renin in the Dog Kidney. Nama Beck, Kwang Sup Kim, and Bernard B. Davis	401
Static Pressure-Flow Relation in the Total Systemic Vascular Bed of the Dog and Its Modification by the Baroreceptor Reflex. Kiichi Sagawa and Arie Eisner	406
Magnetic Determination of the Relationship between the S-T Segment Shift and the Injury Current Produced by Coronary Artery Occlusion. David Cohen and Larry A. Kaufman	414
Dynamics of Glomerular Ultrafiltration in the Rat: VIII. Effects of Hematocrit. Bryan D. Myers, William M. Deen, Channing R. Robertson, and Barry M. Brenner	425
Comparative Uptake of Rat and Human Serum Low-Density and High-Density Lipoproteins by Rat Aortic Smooth Muscle Cells in Culture. Olga Stein and Yechezkiel Stein	436
Disorders of Cellular Electrophysiology Produced by Ischemia of the Canine His Bundle. Ralph Lazzara, Nabil El-Sherif, and Benjamin J. Scherlag	444
Hemodynamic and Humoral Characteristics of Hypertension Induced by Prolonged Stellate Ganglion Stimulation in Conscious Dogs. Jean-Francois Liard, Robert C. Tarazi, Carlos Maria Ferrario, and William M. Manger	455
News from the American Heart Association	465

No. 4 (April)

Brief Reviews: Brain Amines and Models of Experimental Hypertension. J. P. Chalmers	469
Hypothermic Arrest and Potassium Arrest: Metabolic and Myocardial Protection during Elective Cardiac Arrest. David J. Hearse, David A. Stewart, and Mark V. Braimbridge	481
Detection of Latent Function in Acutely Ischemic Myocardium in the Dog: Comparison of Pharmacologic Inotropic Stimulation and Postextrasystolic Potentiation. Stephen H. Dyke, Charles W. Urschel, Edmund H. Sonnenblick, Richard Gorlin, and Peter F. Cohn	490
A One-Dimensional Viscoelastic Model of Cat Heart Muscle Studied by Small Length Perturbations during Isometric Contraction. Louis Loeffler, III, and Kiichi Sagawa	498

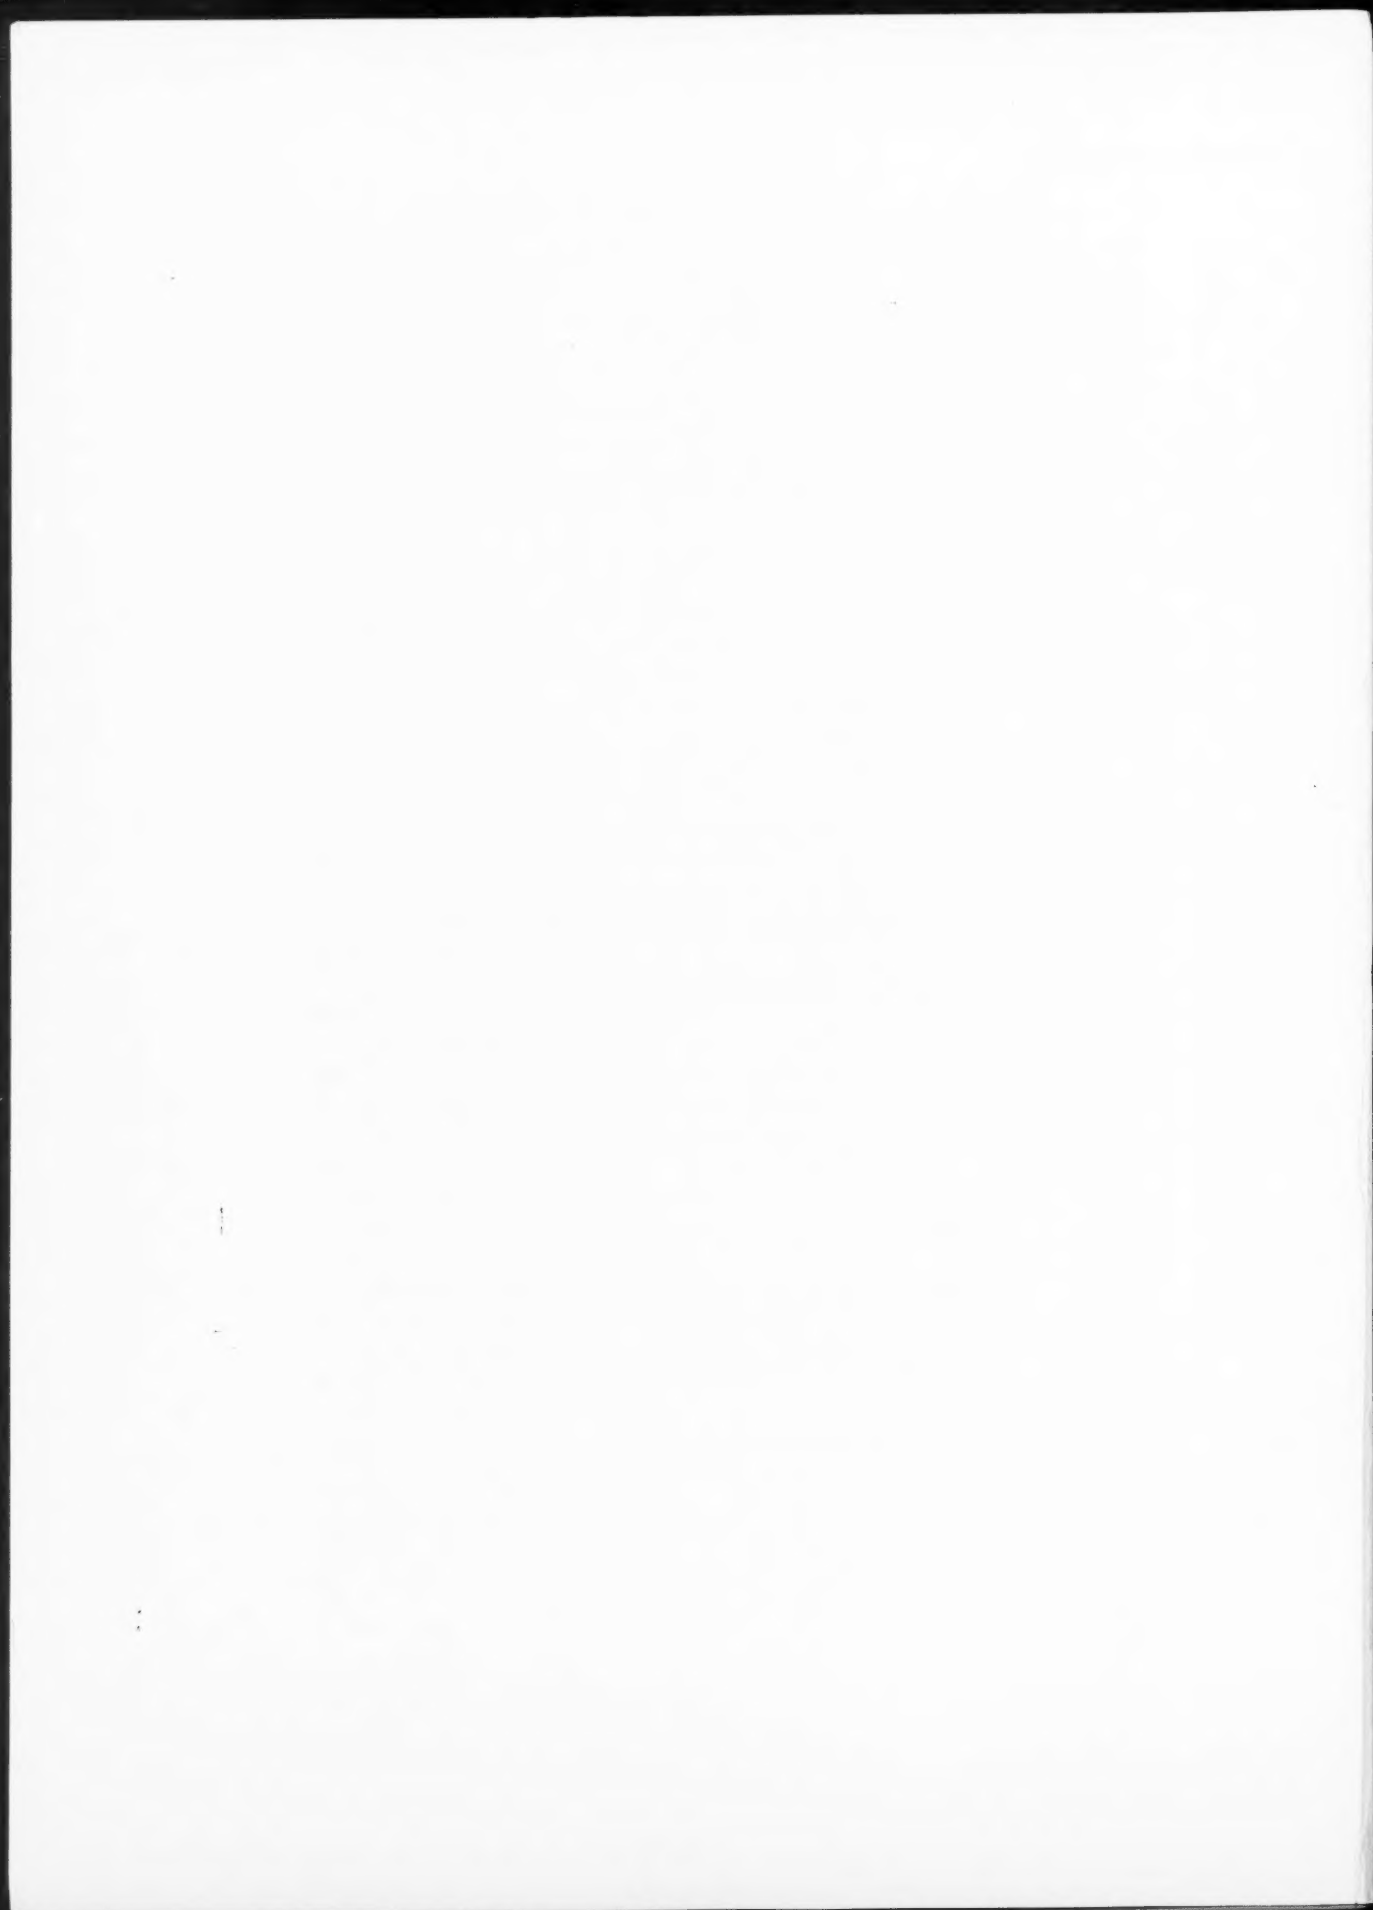

A Renin Inhibitor from Rabbit Kidney: Conversion of a Large Inactive Renin to a Smaller Active Enzyme. Brenda J. Leckie and Anne McConnell	513
The Heart as a Target Organ in Systemic Allergic Reactions: Comparison of Cardiac Anaphylaxis In Vivo and In Vitro. Norine Capurro and Roberto Levi	520
Continuous Inhibition of Renin Release in Dogs by Vagally Innervated Receptors in the Cardiopulmonary Region. Giuseppe Mancina, J. Carlos Romero, and John T. Shepherd	529
Baroreceptor Reflex Effects on Transient and Steady-State Hemodynamics of Salt-Loading Hypertension in Dogs. Allen W. Cowley, Jr., and Arthur C. Guyton ..	536
In Vitro Acetylcholine Biosynthesis in Normal and Failing Guinea Pig Hearts. Robert Roskoski, Jr., Phillip G. Schmid, Howard E. Mayer, and Francois M. Abboud	547
Arterial Lysosomes and Connective Tissue in Primate Atherosclerosis and Hypertension. Harvey Wolinsky, Sidney Goldfischer, Marie M. Daly, Lisa E. Kasak, and Bernice Coltoff-Schiller	553
News from the American Heart Association	562

No. 5 (May)

Brief Reviews: Arterial Impedance as Ventricular Afterload. William R. Milnor	565
Impairment of Autonomically Mediated Heart Rate Control in Patients with Cardiac Dysfunction. Robert E. Goldstein, G. David Beiser, Morris Stampfer, and Stephen E. Epstein	571
Intimal Ultrastructure of Human Umbilical Arteries: Observations on Arteries from Newborn Children of Smoking and Nonsmoking Mothers. Inger Asmussen and Knud Kjeldsen	579
Hypertension, Transmural Pressure, and Vascular Smooth Muscle Response in Rats. Timothy R. Hansen and David F. Bohr	590
Modulation by Prostaglandins of Adrenergic Transmission in the Isolated Perfused Rabbit and Rat Kidney. Kafait U. Malik and John C. McGiff	599
Local Cerebral Blood Volume Determined by Three-Dimensional Reconstruction of Radionuclide Scan Data. David E. Kuhl, Martin Reivich, Abass Alavi, Istvan Nyary, and Muni M. Staum	610
Effect of Sympathetic Nerve Stimulation on Cerebral and Cephalic Blood Flow in Dogs. Richard J. Traystman and Carlos E. Rapela	620
A New Method of Measuring Propagation Coefficients and Characteristic Impedance in Blood Vessels. William R. Milnor and Wilmer W. Nichols	631
Inherited Depression of Arterial Lipoamide Dehydrogenase Activity Associated with Susceptibility to Atherosclerosis in Pigeons. Tibor Zemplyenyi, David H. Blankenhorn, and Alan J. Rosenstein	640
Histamine Potentiation of Nerve- and Drug-Induced Responses of a Rabbit Cerebral Artery. John A. Bevan, Sue Piper Duckles, and Tony J-F. Lee	647
Simulation of Action Potential Propagation in an Inhomogeneous Sheet of Coupled Excitable Cells. Ronald W. Joyner, Fidel Ramón, and John W. Moore	654
Correlation between the Response of the Heart to Sympathetic Stimulation and the Release of Endogenous Catecholamines into the Coronary Sinus of the Dog. Nobuharu Yamaguchi, Jacques de Champlain, and Réginald Nadeau	662
Letters to the Editor	669
News from the American Heart Association	672

No. 6 (June)

Brief Reviews: Pathogenesis of Oliguria in Acute Renal Failure. William F. Finn, William J. Arendshorst, and Carl W. Gottschalk	675
Responses to Type B Atrial Vagal Receptors to Changes in Wall Tension during Atrial Filling. Giorgio Recordati, Federico Lombardi, Vernon S. Bishop, and Alberto Malliani	682
Primary Role of Renal Homografts in Setting Chronic Blood Pressure Levels in Rats. Lewis K. Dahl and Martha Heine	692
Changes in Myocardial Blood Flow and S-T Segment Elevation following Coronary Artery Occlusion in Dogs. Howard J. Smith, Bramah N. Singh, Robin M. Norris, Murray B. John, and Peter J. Hurley	697
Vascular Responses to Prostaglandin $F_{2\alpha}$ in Isolated Cat Lungs. Andrew J. Lonigro and Christopher A. Dawson	706
Depolarization-Induced Movement of Mn^{2+} across the Cell Membrane in the Guinea Pig Myocardium: Its Effect on the Mechanical Response. Jean F. Delahayes	713
Differentiation of Neurogenic and Myocardial Angiotensin II Receptors in Isolated Rabbit Atria. Alan L. Blumberg, John A. Ackerly, and Michael J. Peach	719
Inotropic Effects of Different Calcium Ion Concentrations on the Embryonic Chick Ventricle: Comparison of Single Cultured Cells and Intact Muscle Strips. William H. Barry, Roger Pitzen, Kenneth Protas, and Donald C. Harrison	735
Pressure Drop across Artificially Induced Stenoses in the Femoral Arteries of Dogs. Donald F. Young, Neal R. Cholvín, and Allan C. Roth	735
Correlation of the Glycoside Response, the Force Staircase, and the Action Potential Configuration in the Neonatal Rat Heart. Glen A. Langer, Allan J. Brady, Swee T. Tan, and S. David Serena	744
Inhibition of Coronary Blood Flow by a Vascular Waterfall Mechanism. James M. Downey and Edward S. Kirk	753
Mechanism of the Serotonin Effect on Lung Transvascular Fluid and Protein Movement in Awake Sheep. Kenneth L. Brigham and Patty Jill Owen	761
Reduced Myocardial Reflow and Increased Coronary Vascular Resistance following Prolonged Myocardial Ischemia in the Dog. James T. Willerson, John T. Watson, Ian Hutton, Gordon H. Templeton, and David E. Fixler	771
Determinants of Fast- and Slow-Pathway Conduction in Patients with Dual Atrioventricular Nodal Pathways. Delon Wu, Pablo Denes, Ramesh Dhingra, Christopher Wyndham, and Kenneth M. Rosen	782
Mesenteric Hemodynamics in Early Experimental Renal Hypertension in Dogs. Geza Simon, Motilal B. Pamnani, John F. Dunkel, and Henry W. Overbeck	791
Serotonin Transport by Cultured Bovine Aortic Endothelium. David Shepro, John C. Batbouta, Louis S. Robblee, Mary Pat Carson, and Frank A. Belamarich	799
Books Received	807
News from the American Heart Association	808

SUBJECT INDEX

A

- Acetylcholine**
biosynthesis in failing hearts, 547
- Acetylene inhalation**
lung tissue volume in pulmonary edema, 229
- Acidosis**
pulmonary vascular responses to prostaglandin $F_{2\alpha}$, 706
- Action potential**
correlation of glycoside response, force staircase and action potential configuration in neonatal rat heart, 744
depolarization-induced movement of Mn^{2+} across cell membrane in guinea pig myocardium, 713
Purkinje fibers surviving MI in dogs, 127
simulation of propagation in inhomogeneous sheet of coupled excitable cells, 654
- Adenosine triphosphate**
elective cardiac arrest, 481
- Adenylate cyclase**
cyclic AMP and alterations in cardiac contractility, 392
and sodium, potassium-activated adenosinetriphosphatase activities, 8
- Adrenergic receptors**
dobutamine, 185
- Adrenergic transmitters**
modulation by prostaglandins of adrenergic transmission in isolated kidney, 599
- Afferent arterioles**
effects of hematocrit on glomerular filtration, 425
- Afterload**
arterial impedance as ventricular afterload, 565
- Age changes**

 - determination of, 229
- Pulmonary receptors**
 - heart and lung receptors, 310
- Pulmonary wedge pressure**
 - lung tissue volume in pulmonary edema, 229
- Pulsatile flow**
 - pressure drop across stenoses in femoral arteries of dogs, 735
 - through a branch, 277
- Pulse waves**
 - hemodynamic effects of experimental coarctation, 165
 - measurement of propagation coefficients, 631
- Purkinje fibers**
 - manganese and electrogenic phenomena, 377
 - surviving extensive MI in dogs, 127
- Pyruvate dehydrogenase complex**
 - arterial lipoamide dehydrogenase, 630

R

- Radioactive microspheres**
 - blood flow and S-T segment elevation following coronary artery occlusion, 697
 - effect of hemodilution on renal blood flow, 71
 - intrarenal blood flow in caval dogs, 216
 - reduced reflow in canine heart, 771
- Radioimmunoassay**
 - for angiotensin I, 529
- Radioisotopic techniques**
 - comparison of krypton-85 and xenon-133 cerebral blood flow measurements in focal ischemia, 18
- Radionuclide scan data**
 - local cerebral blood volume, 610
- Radiopaque markers**
 - motion of tricuspid annulus, 43
- Receptors**
 - heart and lung receptors, 310
 - inhibition of renin release in dogs by vagally innervated receptors in lungs, 529
 - response of atrial vagal receptors to changes in wall tension, 682
- Red cells**
 - permeability transit time effect, 352
 - red cell carriage of label, 328
- Reflection coefficients**
 - negative interstitial pressure, 222
- Reflexes**
 - interaction of baroreflexes and chemoreflexes, 270
 - heart and lung receptors, 310
- Reflow patterns**
 - reduced reflow and increased coronary vascular resistance following prolonged ischemia, 771
- Refractory periods**
 - dual A-V nodal pathways, 782
 - effect of lidocaine in canine AMI, 84
- Renal ablation**
 - functional and hemodynamic adaptation, 286
- Renal autoregulation**
 - single nephron filtration rate in flow to macula densa, 358
- Renal blood flow**
 - effect of hemodilution on, 71
 - functional and hemodynamic adaptation to renal ablation, 286
 - renin and heart-lung receptors, 529
- Renal clearance**
 - intrarenal blood flow in caval dogs, 216
- Renal failure**
 - pathogenesis of oliguria in, 675
- Renal function**
 - prostaglandins and, 197
- Renal hemodynamics**
 - prostaglandins and, 204

Renin

- and catecholamine-dependent cyclic AMP in canine kidney, 401
- inhibitor from rabbit kidney, 513
- role of renin and sodium in malignant hypertension, 300

Renin release

- inhibition in dogs by vagally innervated receptors in cardiopulmonary region, 529

Reperfusion

- pressure-rate alterations and segmental dyskinesia during AMI, 145

Rheology

- effect of hemodilution on renal blood flow, 71

S

Saphenous artery

- histamine potentiation, 647

Sarcolemma

- adenylate cyclase and Na, K-ATPase activities, 8

Segmental shortening

- inotropic stimulation in acute ischemia, 490

Sensitivity

- vascular smooth muscle in hypertension, 590

Serotonin

- effects on contractile responses of basilar artery, 647
- effects on lung transvascular fluid and protein movement in awake sheep, 761
- histamine potentiation, 647
- pulmonary vascular responses to prostaglandin $F_{2\alpha}$ in cat lung, 706
- transport by cultured bovine aortic endothelium, 799

Sexual activity

- increased blood pressure and sympathetic nerve tone, 118

Shear force

- vascular endothelium-leukocyte interaction, 173

Shock, cardiogenic

- dobutamine and increased cardiac contractility, 185

Slow channel

- correlation of glycoside response, force staircase and action potential in neonatal rat heart, 744
- depolarization-induced movement of Mn^{2+} across cell membrane in guinea pig myocardium, 713
- ischemia of the canine His bundle, 444
- manganese and electrogenic phenomena in Purkinje fibers, 377

Smoking

- ultrastructure of umbilical arteries in smokers, 579

Smooth muscle cells

- effect of insulin on arterial, 319
- hypertension, transmural pressure, and vascular smooth muscle response in rats, 590
- lipoprotein uptake by rat aortic cells in culture, 436

Social environment

- model of psychosocial hypertension, 156

Sodium

- adenylate cyclase and Na, K-ATPase, 8
- angiotensin pressor response to, 113
- contractility in heart muscle, 27
- correlation of glycoside response, force staircase and action potential in neonatal rat heart, 744
- hypertension and cardiac nerves, 455
- intrarenal blood flow in caval dogs, 216
- renal homografts and chronic blood pressure, 692
- role of renin and sodium in malignant hypertension, 300

Sphingomyelin

- and other phospholipid metabolism in rabbit atheromatous and normal aorta, 294

Spike discharge

- vascular response to dynamic stretch, 76

Steal and reverse steal

- comparison of krypton-85 and xenon-133 cerebral blood flow measurements in focal ischemia, 18

Stellate ganglion stimulation

- catecholamine release and cardiac responses, 662
- effect of sympathetic nerve stimulation on cerebral and cephalic blood flow, 620
- hypertension induced by, 455

Stenoses

- pressure drop across artificially induced stenoses in femoral arteries of dogs, 735

Stiffness, muscles

viscoelastic model of cat heart muscle, 498

Stimulus-response theorem

red cell permeability effect on mean transit time of an indicator, 352

Stress-relaxation

viscoelastic model of cat heart muscle, 498

Strontium

vascular smooth muscle in hypertension, 590

S-T segment

ECG response to LV hypertrophy and ischemia, 92

elevation and changes in myocardial blood flow following occlusion in dogs, 697

magnetic determination of injury current, 414

Sucrose

contractility in heart muscle, 27

Surgery

coronary bypass

elective cardiac arrest, 481

inotropic stimulation in acute ischemia, 490

motion of tricuspid annulus, 43

kidney transplantation

renal homografts and chronic blood pressure, 692

Sympathetic fibers

catecholamine release and cardiac responses, 662

Sympathetic nerve stimulation

angiotensin II receptors in isolated rabbit atria, 719

effect on cerebral and cephalic blood flow in dogs, 620

prostaglandins and adrenergic transmission in kidneys, 599

responses of atrial vagal receptors, 682

Sympathetic nerve tone

increased blood pressure and, 118

Sympathetic nervous system

hypertension induced by stellate ganglion stimulation in dogs, 455

impairment of heart rate control in cardiac patients, 571

sympathetic stimulation and release of catecholamines in coronary sinus of dogs, 662

Systole

inhibition of coronary blood flow by vascular waterfall mechanism, 753

T**Tachyarrhythmias**

ventricular

effects of lidocaine in canine AMI, 84

^{99m}Tc-labeled red blood cells

to determine local cerebral blood volume, 610

Tetrodotoxin

manganese and electrogenic phenomena in Purkinje fibers, 377

Thiourea

red cell carriage of label, 328

red cell permeability transit time effect, 352

Thyroid activity

effect on enzymatic characteristics of cardiac myosin, 208

Thyroxine

effect of thyroid state on cardiac myosin, 208

Tissue culture

calcium effects on cultured ventricular cells, 727

ultrastructure of umbilical arteries in smokers, 579

Tissue linings

permeability of connective tissue linings isolated from implanted capsules, 222

Total peripheral resistance

and baroreceptor reflex, 406

effects on salt-loading hypertension, 536

Transmembrane potentials

ischemia of canine His bundle, 444

Transplants, kidney

renal homografts and chronic blood pressure, 692

Trauma

intimal injury and regrowth in rabbit aorta, 58

Tricuspid valve

motion of annulus in anesthetized intact dogs, 43

Turbulence

pressure drop across stenoses in femoral arteries of dogs, 735

T-wave

ECG response of LV hypertrophy and ischemia, 92

Tyramine

angiotensin II receptors in isolated rabbit atria, 719

Tyrosine hydroxylase

increased blood pressure and sympathetic nerve tone, 118

U**Ultrasound**

pressure-rate alterations and segmental dyskinesia during AMI, 145

Ultrastructure

of umbilical arteries in smokers, 579

Umbilical arteries

ultrastructure in smokers, 579

Urea

red cell carriage of label, 328

red cell permeability transit time effect, 352

V**Vagal afferents**

heart and lung receptors, 310

renin and heart-lung receptors, 529

Vagal block

renin and heart-lung receptors, 529

Vagal stimulation

responses of atrial vagal receptors, 682

Vascular disease

arterial lysosomes and connective tissue in primate atherosclerosis and hypertension, 553

Vascular endothelium

leukocyte interaction, 173

Vascular impedance

ventricular afterload and, 565

Vascular injury

ultrastructure of umbilical arteries in smokers, 579

Vascular pathology

hemodynamics of renal hypertension, 791

Vascular resistance

effects of hematocrit on glomerular filtration, 425

reduced reflow in canine heart and, 771

Vascular response

to dynamic stretch, 76

interaction of baroreflexes and chemoreflexes, 270

Vascular smooth muscle

in hypertension, 590

response to dynamic stretch, 76

Vascular waterfall mechanism

inhibition of coronary blood flow by, 753

Vasectomy

increased blood pressure and sympathetic nerve tone, 118

Vasoactive mediators

serotonin effects on lung fluid balance, 761

Vasoconstriction

effect of sympathetic nerve stimulation on cerebral and cephalic blood flow, 620

prostaglandins and adrenergic transmission in kidneys, 599

pulmonary vascular responses to prostaglandin F_{2α}, 706**Vasodilatation**

anoxia-induced, 34

pressure-rate alterations and segmental dyskinesia during AMI, 145

Vasomotor center

atria, ventricles, and lungs each responsible for tonic inhibition of, 310

Vasopressin

renin and catecholamine-dependent cyclic AMP in dog kidney, 401

Vasopressor agents

pressure-rate alterations and segmental dyskinesia during AMI, 145

Vectors

localization of heart vectors produced by epicardial burns and ectopic stimuli, 105

Vena cava ligation

renal intracortical blood flow in dogs following, 216

Venous resistance

mesenteric hemodynamics in renal hypertension, 791

Ventricles

asynergy

inotropic stimulation in acute ischemia, 490

depolarization-induced movement of Mn²⁺ across cell membrane in guinea pig myocardium, 713

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 37

July-December
1975

AMERICAN HEART ASSOCIATION, INC.

Circulation Research

An Official Journal of the American Heart Association

Circulation Research provides a medium for bringing together basic research on the cardiovascular system from various disciplines including biology, biochemistry, biophysics, morphology, pathology, physiology, and pharmacology. The Journal will also accept for publication manuscripts on clinical research that contribute to an understanding of fundamental problems.

Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 37

July-December 1975

No. 1 (July)

Brief Reviews: Ultrastructure of the Myocardial Sarcolemma. N. Scott McNutt	1
Effect of Sympathetic Denervation on Smooth Muscle Cell Proliferation in the Growing Rabbit Ear Artery. Rosemary D. Bevan	14
Effect of Lidocaine and Quinidine on Steady-State Characteristics and Recovery Kinetics of $(dV/dt)_{max}$ in Guinea Pig Ventricular Myocardium. Chia-Maou Chen, Leonard S. Gettes, and Bertram G. Katzung	20
Des-1-Asp-Angiotensin II: Possible Intrarenal Role in Homeostasis in the Dog. Ronald H. Freeman, James O. Davis, and Thomas E. Lohmeier	30
Radioiodinated Soluble Canine Fibrin: Preparation and Evaluation as a Thrombus Localizing Agent in the Dog. R. Edward Coleman, Sylvia S. L. Harwig, John F. Harwig, Laurence A. Sherman, and Michael J. Welch	35
Reflex Heart Rate Control Via Specific Aortic Nerve Afferents in the Rabbit. Merrill B. Kardon, D. Fred Peterson, and Vernon S. Bishop	41
The Differences in Atrioventricular Conduction of Premature Beats in Young and Adult Goats. William B. Gough and E. Neil Moore	48
Disappearance of Bradykinin in the Renal Circulation of Dogs: Effects of Kininase Inhibition. Alberto Nasjletti, Jose Colina-Chourio, and John C. McGiff	59
Control of Aldosterone Secretion in the Spontaneously Hypertensive Rat. Ronald H. Freeman, James O. Davis, Nora Varsano-Aharon, Stanley Ulick, and Myron H. Weinberger	66
Localization Patterns of Plasma Apolipoproteins in Human Atherosclerotic Lesions. Henry F. Hoff, Carol L. Heideman, Richard L. Jackson, Roberto J. Bayardo, Han-Seob Kim, and Antonio M. Gotto, Jr.	72
Effect of Norepinephrine and Fluid Administration on Pulmonary Extravascular Water Volume in Dogs. James H. Ellis, Jr., and John F. Murray	80
Control of Myocardial Oxygen Tension by Sympathetic Coronary Vasoconstriction in the Dog. Eric O. Feigl	88
Vascular Angiotensin II Receptors and Sodium Balance in Rats: Role of Kidneys and Vascular Renin Activity. John D. Swales, John D. Tange, and Herbert Thurston	96
Effects of Norepinephrine and Angiotensin II on the Determinants of Glomerular Ultrafiltration and Proximal Tubule Fluid Reabsorption in the Rat. Bryan D. Myers, William M. Deen, and Barry M. Brenner	101
Uniformity of Transmural Perfusion in Anesthetized Dogs with Maximally Dilated Coronary Circulations. H. Fred Downey, Fouad A. Bashour, Roger B. Boatwright, Paul E. Parker, and Sarkis J. Kechejian	111
Effects of Extracellular Calcium and Sodium on Depolarization-Induced Automaticity in Guinea Pig Papillary Muscle. Bertram G. Katzung	118
Instructions to Authors	128
News from the American Heart Association	132

No. 2 (August)

Brief Reviews: Estimation of Extravascular Lung Water by Indicator-Dilution Techniques. Francis P. Chinard	137
Effects of Neurotransmitters Injected into the Posterior and the Anterior Septal Artery on the Automaticity of the Atrioventricular Junctional Area of the Dog Heart. Shigeru Motomura, Toshihiko Iijima, Norio Taira, and Koroku Hashimoto	146
The Sequence of Retrograde Atrial Activation in the Canine Heart: Correlation with Positive and Negative Retrograde P Waves. Albert L. Waldo, Kari J. Vitikainen, and Brian F. Hoffman	156
Upper Limit of Cerebral Blood Flow Autoregulation in Experimental Renovascular Hypertension in the Baboon. Svend Strandgaard, John V. Jones, Eric T. MacKenzie, and A. Murray Harper	164
Alpha-Receptor Stimulation by Endogenous and Exogenous Norepinephrine and Blockade by Phentolamine in Pial Arteries of Cats. Wolfgang Kuschinsky and Michael Wahl	168
Reflex Parasympathetic Coronary Vasodilation Elicited from Cardiac Receptors in the Dog. Eric O. Feigl	175
Analysis of Changes in Reactivity of Rabbit Arteries and Veins Two Weeks after Induction of Hypertension by Coarctation of the Abdominal Aorta. John A. Bevan, Rosemary D. Bevan, Potter C. Chang, Barbara L. Pegram, Ralph E. Purdy, and Che Su	183
Regional Differences in Myocardial Performance in the Left Ventricle of the Dog. Martin M. LeWinter, Richard S. Kem, John M. Kroener, Thomas E. Carew, and James W. Covell	191
Role of Cardiac, Pulmonary, and Carotid Mechanoreceptors in the Control of Hind-Limb and Renal Circulation in Dogs. Giuseppe Mancía, John T. Shepherd, and David E. Donald	200
Visceromotor Organization within Descending Spinal Sympathetic Pathways in the Dog. Susan M. Barman and Robert D. Wurster	209
Effects of an Inotropic Agent, RO 2-2985 (X-537A), on Regional Blood Flow and Myocardial Function in Chronically Instrumented Conscious Dogs and Anesthetized Dogs. Henry G. Hanley, Robert M. Lewis, Craig J. Hartley, Dean Franklin, and Arnold Schwartz	215
Fulminating Arterial Hypertension with Pulmonary Edema from Release of Adrenomedullary Catecholamines after Lesions of the Anterior Hypothalamus in the Rat. Marc A. Nathan and Donald J. Reis	226
Reduced Baroreflex Sensitivity with Volume Loading in Conscious Dogs. Stephen F. Vatner, Dedo H. Boettcher, Guy R. Heyndrickx, and Robert J. McRitchie	236
Ventricular Intramural and Epicardial Potential Distributions during Ventricular Activation and Repolarization in the Intact Dog. Madison S. Spach and Roger C. Barr	243
News from the American Heart Association	258

No. 3 (September)

Brief Reviews: Myocardial Reactive Hyperemia. Ray A. Olsson	263
Effect of Increased Vascular Pressure on Lung Fluid Balance in Unanesthetized Sheep. A. John Erdmann, III, Thomas R. Vaughan, Jr., Kenneth L. Brigham, William C. Woolverton, and Norman C. Staub	271
Bronchopulmonary Arterial Shunting without Anatomic Anastomosis in the Dog. Albert L. Hyman, David S. Knight, Paul D. Joiner, and Philip J. Kadowitz	285

Sarcomere Length-Tension Relations in Living Rat Papillary Muscle. Fred J. Julian and Michael R. Sollins	299
Interaction between Cyclic Adenosine Monophosphate and Cyclic Guanosine Monophosphate in Guinea Pig Ventricular Myocardium. August M. Watanabe and Henry R. Besch, Jr.	309
Direct Effect of Beta-Adrenergic Stimulation on Renin Release by the Rat Kidney Slice In Vitro. Myron H. Weinberger, Wataru Aoi, and David P. Henry	318
Effects of Potassium Ion on the Microcirculation of the Hamster. Brian R. Duling	325
Altered Ion Transport in Aortic Smooth Muscle during Deoxycorticosterone Acetate Hypertension in the Rat. Allan W. Jones and Robert G. Hart	333
Sleep-Stage Regulation of Ventricular Arrhythmias in the Unanesthetized Pig. James E. Skinner, David N. Mohr, and Peter Kellaway	342
Selective Inhibition by des-1-Asp-8-Ile-Angiotensin II of the Steroidogenic Response to Restricted Sodium Intake in the Rat. Christina A. Sarstedt, E. Darracott Vaughan, Jr., and Michael J. Peach	350
Myocardial Sodium Extraction at Varied Coronary Flows in the Dog: Estimation of Capillary Permeability by Residue and Outflow Detection. Barbara Guller, Tada Yipintsoi, Alan L. Orvis, and James B. Bassingthwaite	359
Effect of Exercise on Dilution Estimates of Extravascular Lung Water and on the Carbon Monoxide Diffusing Capacity in Normal Adults. Carl A. Goresky, J. Wayne Warnica, John H. Burgess, and Brita E. Nadeau	379
Glycoside Inotropy in the Absence of an Increase in Potassium Efflux in the Rabbit Heart. Philip A. Poole-Wilson and Glenn A. Langer	390
Letters to the Editor	396
News from the American Heart Association	398

No. 4 (October)

Brief Reviews: The Voltage Clamp and Cardiac Electrophysiology. Harry A. Fozzard and George W. Beeler, Jr.	403
Sinoatrial Transmission and Atrial Invasion during Normal Rhythm in the Rabbit Heart. Masako Oya Masuda and Antonio Paes de Carvalho	414
Influence of Cardiopulmonary Vagal Afferent Activity on Carotid Chemoreceptor and Baroreceptor Reflexes in the Dog. Hiroyuki Koike, Allyn L. Mark, Donald D. Heistad, and Phillip G. Schmid	422
Inhibition of Bradykinin Vasodilation and Potentiation of Norepinephrine and Angiotensin Vasoconstriction by Inhibitors of Prostaglandin Synthesis in Skeletal Muscle of the Rat. Edward J. Messina, Richard Weiner, and Gabor Kaley	430
Transmural Gradients in Ventricular Tissue Metabolites Produced by Stopping Coronary Blood Flow in the Dog. Robert B. Dunn and Douglas M. Griggs, Jr.	438
Effect of Spatial Variations in Shear on Diffusion at the Wall of an Arterial Branch. Morton H. Friedman and Louis W. Ehrlich	446
Changes in Intramyocardial ST Segment Voltage and Gas Tensions with Regional Myocardial Ischemia in the Dog. Shukri F. Khuri, John T. Flaherty, John B. O'Riordan, Bertram Pitt, Robert K. Brawley, James S. Donahoo, and Vincent L. Gott	455
Control of Renin Secretion in the Dog: Effects of Furosemide on the Vascular and Macula Densa Receptors. William A. Corsini, Jerry B. Hook, and Michael D. Bailie ..	464
Precordial and Epicardial Surface Potentials during Myocardial Ischemia in the Pig: A Theoretical and Experimental Analysis of the TQ and ST Segments. Roger P. Holland and Harold Brooks	471

Stress, Deformation, and Atelectasis of the Lung. Yuan-Cheng Fung	481
Does the Surface Tension Make the Lung Inherently Unstable? Yuan-Cheng Fung	497
Evidence for an Increase in Adrenergic Nerve Function in Blood Vessels from Experimental Hypertensive Rabbits. Rosemary D. Bevan, Ralph E. Purdy, Che Su, and John A. Bevan	503
Static Linear and Nonlinear Elastic Properties of Normal and Arterialized Venous Tissue in Dog and Man. Robert L. R. Wesly, Ramesh N. Vaishnav, James C. A. Fuchs, Dali J. Patel, and Joseph C. Greenfield, Jr.	509
Letters to the Editor	521
News from the American Heart Association	522

No. 5 (November)

Brief Reviews: The Metabolic Significance of the Malate-Aspartate Cycle in Heart. Brian Safer	527
Interaction of Sequential Stimuli Applied during the Relative Refractory Period in Relation to Determination of Fibrillation Threshold in the Canine Ventricle. Juan Tamargo, Bruce Moe, and Gordon K. Moe	534
Acetylcholine-Induced Reversal of Canine and Feline Atrial Myocardial Depression during Stretch, Cardiac Failure, and Drug Toxicity. Henry Gelband, Robert J. Myerburg, Brian F. Hoffman, and Arthur L. Bassett	542
Effects of Decreasing Arterial Blood Pressure on Cerebral Blood Flow in the Baboon: Influence of the Sympathetic Nervous System. William Fitch, Eric T. MacKenzie, and A. Murray Harper	550
Pathogenesis of Acute Renal Failure following Temporary Renal Ischemia in the Rat. William J. Arendshorst, William F. Finn, and Carl W. Gottschalk	558
Central and Peripheral Adrenergic Mechanisms in the Development of Deoxycorticosterone-Saline Hypertension in Rats. John L. Reid, Justin A. Zivin, and Irwin J. Kopin	569
Calcium-Accumulating Properties of Subcellular Fractions of Bovine Vascular Smooth Muscle. George D. Ford and Michael L. Hess	580
Influence of Hematocrit, Blood Gas Tensions, and pH on Pressure-Flow Relations in the Isolated Canine Lung. Daumants Bucens and Michael C. F. Pain	588
Potassium Influx in the Frog Atrium during the Cardiac Cycle. David F. Juncker, Peter Y. H. Lee, Ernest A. Greene, Richard Stish, and Victor Lorber	597
Active and Passive Immunization Against Angiotensin II in the Rat and Rabbit: Evidence for a Normal Regulation of the Renin-Angiotensin System. Peter Oster, Harald Bauknecht, and Eberhard Hackenthal	607
Abnormalities of Renal Perfusion and the Renal Pressor System in Dogs with Chronic Aortic Coarctation. Susan P. Bagby, Walter J. McDonald, David W. Strong, George A. Porter, William M. Bennett, and Lawrence I. Bonchek	615
Influence of Potassium Ions and Osmolality on the Resting Membrane Potential of Rabbit Ventricular Papillary Muscle with Estimation of the Activity and the Activity Coefficient of Internal Potassium. Toshio Akiyama and Harry A. Fozzard	621
Effect of Lidocaine on the Early Inward Transient Current in Sheep Cardiac Purkinje Fibers. Francis M. Weld and J. Thomas Bigger, Jr.	630
Effect of the Angiotensin II Blocker 1-Sar-8-Ala-Angiotensin II on Renal Artery Clip Hypertension in the Rat. Graham J. Macdonald, Graham W. Boyd, and W. Stanley Peart	640
Increased Sheep Lung Vascular Permeability Caused by Histamine. Kenneth L. Brigham and Patty Jill Owen	647

Dissociation Constant of the Norepinephrine-Receptor Complex in Normotensive and Hypertensive Rats. Robert B. Strecker, Walter C. Hubbard, and Andrew M. Michelakis	658
Interaction of the Chemoreflex and the Pulmonary Inflation Reflex in the Regulation of Coronary Circulation in Conscious Dogs. Stephen F. Vatner and Robert J. McRitchie	664
Membrane Currents and Tension in Cat Ventricular Muscle Treated with Cardiac Glycosides. Terence F. McDonald, Hermann Nawrath, and Wolfgang Trautwein	674
Role of Prostaglandins in the Reversal of One-Kidney Hypertension in the Rabbit. J. Carlos Romero, Cobern E. Ott, Juan J. Aguilo, Vicente E. Torres, and Cameron G. Strong	683
News from the American Heart Association	690

No. 6 (December)

Brief Reviews: Interactions between Behavior and the Cardiovascular System. David H. Cohen and Paul A. Obrist	693
In Vivo Determination of Cerebral Blood Volume with Radioactive Oxygen-15 in the Monkey. John O. Eichling, Marcus E. Raichle, Robert L. Grubb, Jr., Kenneth B. Larson, and Michel M. Ter-Pogossian	707
Chronic One-Kidney Hypertension in Rabbits: I. Treatment with Kidney Extracts. Leonard T. Skeggs, Joseph R. Kahn, Melvin Levine, Frederic E. Dorer, and Kenneth E. Lentz	715
Expansion of Extracellular Space in the Nonischemic Zone of the Infarcted Heart and Concomitant Changes in Tissue Electrolyte Contents in the Rat. Philip I. Polimeni and Jafar Al-Sadir	725
Effect of Coronary Blood Flow on Glycolytic Flux and Intracellular pH in Isolated Rat Hearts. James R. Neely, Jeffrey T. Whitmer, and Michael J. Rovetto	733
Mechanisms of Glycolytic Inhibition in Ischemic Rat Hearts. Michael J. Rovetto, William F. Lamberton, and James R. Neely	742
Analysis of Coronary Flow Fields in Thoracotomized Dogs. H. Bülent Atabek, Sung C. Ling, and Dali J. Patel	752
Comparison of Contractile Performance of Canine Atrial and Ventricular Muscles. Ferdinand Urthaler, Alfred A. Walker, Lloyd L. Hefner, and Thomas N. James	762
Baroreceptor Reflex Control of Arterial Hemodynamics in the Dog. Robert H. Cox and Roger J. Bagshaw	772
Muscle Stiffness Determined from Canine Left Ventricular Pressure-Volume Curves. Stanton A. Glantz and Robert S. Kernoff	787
Hypotensive Effect of Clonidine during Sodium Depletion in the Rat. Donald T. Pals ..	795
Hormone Interactions in the Isolated Rabbit Heart: Synthesis and Coronary Vasomotor Effects of Prostaglandins, Angiotensin, and Bradykinin. Philip Needleman, Garland R. Marshall, and Burton E. Sobel	802
Pressure-Flow and Pressure-Volume Relations in the Entire Pulmonary Vascular Bed of the Dog Determined by Two-Port Analysis. Artin A. Shoukas	809
Glomerular Filtration Response to Elevated Ureteral Pressure in Both the Hydropenic and the Plasma-Expanded Rat. Roland C. Blantz, Karen S. Konnen, and Bryan J. Tucker	819
Analysis of Ventricular Activation and Repolarization from Intramural and Epicardial Potential Distributions for Ectopic Beats in the Intact Dog. Madison S. Spach and Roger C. Barr	830

Electrophysiological Actions of Disopyramide Phosphate on Canine Ventricular Muscle and Purkinje Fibers. Teresa Kus and Betty I. Sasyniuk	844
Norepinephrine Turnover in the Heart and Spleen of the Cardiomyopathic Syrian Hamster. Michael J. Sole, Chi-Man Lo, Cleve W. Laird, Edmund H. Sonnenblick, and Richard J. Wurtman	855

SUBJECT INDEX

A

Acetylcholine

- AV rhythm and neurotransmitters, 146
- effect on cyclic nucleotide levels and on contractility of isolated guinea pig ventricles, 309

Acetylcholine-induced reversal of atrial depression, 342

- glycoside inotropy in absence of increase in potassium efflux in rabbit heart, 390

Action potentials

- electrophysiological actions of disopyramide phosphate on canine ventricular muscle and Purkinje fibers, 844

Adenosine monophosphate (cyclic AMP) levels

- interaction between cyclic GMP and, in guinea pig ventricular myocardium, 309

Adenosine triphosphate (ATP)

- cardiac metabolism without coronary flow, 438

Adrenergic mechanisms

- in development of deoxycorticosterone-saline hypertension in rats, 569

Adrenergic nerve

- altered neuronal function in blood vessels in experimental hypertension, 503

- cyclic nucleotide effects on ventricles, 309

Adrenergic receptors

- dissociation constant of norepinephrine-receptor complex and hypertensive rats, 658

Afferents

- influence of cardiopulmonary vagal afferent activity on carotid chemoreceptor and baroreceptor reflexes in dogs, 422

- reflex heart rate control via specific aortic nerve afferents in rabbits, 41

Aldosterone

- control of secretion in SH rats, 66
- 7-Ile-angiotensin III blockade of aldosterone synthesis, 350
- See also Renin-angiotensin-aldosterone system

Alpha-receptor stimulation

- by norepinephrine and blockade by phentolamine in pial arteries, 168

Angiotensin

- angiotensin II antibodies and renin-angiotensin system, 607

- antagonist I-Sar-8-Ala angiotensin II

- effect on renal artery clip hypertension in rats, 640

- hypotensive effect of clonidine during sodium depletion in rats, 795

- antagonist I-Sar-8-Ile-angiotensin II, 802

- chronic one-kidney hypertension in rabbits, 715

- des-1-Asp-8-Ile-angiotensin II

- inhibition of steroidogenic response to restricted sodium intake, 350

- intrarenal role in homeostasis in dogs, 30

- effects of norepinephrine and, on renal function, 101

- 7-Ile-angiotensin III blockade of aldosterone synthesis, 350

- prostaglandins and microvascular responsiveness, 430

- synthesis and coronary vasomotor effects of prostaglandins, bradykinin and, 802

- vascular angiotensin II receptors and sodium balance in rats, 96

- See also Renin-angiotensin-aldosterone system

Animal studies**baboons**

- cerebral blood flow autoregulation in chronic hypertension, 164

- effects of decreasing arterial blood pressure on CBF in baboons, 550

cats

- acetylcholine-induced reversal of atrial depression, 542

- alpha receptors in pial arteries, 168

- cardiac glycosides, calcium current, and tension, 674

cows

- calcium accumulation in vascular smooth muscle, 580

dogs

- acetylcholine-induced reversal of atrial depression, 542

- analysis of coronary flow fields in thoracotomized dogs, 752

- atrial and ventricular muscles mechanics, 762

- AV rhythm and neurotransmitters, 146

- baroreceptor reflex control of arterial hemodynamics in dogs, 772

- bronchopulmonary arterial shunting, 285

- capillary permeability to sodium, 359

- cardiac metabolism without coronary blood flow, 438

- chemoreflex and pulmonary inflation reflex in regulation of coronary circulation, 664

- control of myocardial oxygen tension by sympathetic coronary vasoconstriction, 88

- disappearance of bradykinin in renal circulation, 59

- effects of furosemide on renin secretion, 464

- effects of norepinephrine and fluid administration on pulmonary extravascular water volume, 80

- effects of RO 2-2985 (X-537A) in awake dogs, 215

- elastic properties of veins, 509

- electrophysiological actions of disopyramide phosphate on ventricular muscle and Purkinje fibers, 844

- influence of cardiopulmonary afferents, 422

- interaction of sequential stimuli applied during relative refractory period, 534

- muscle stiffness determined from LV pressure-volume curves, 787

- perfusate characteristics and pressure-flow relations, 588

- potential distributions for ectopic beats, 830

- pulmonary pressure-flow and pressure-volume relations, 809

- radioiodinated soluble canine fibrin as thrombus localizing agent, 35

- reduced baroreflex sensitivity with volume loading in dogs, 236

- reflex control of muscle and renal flow, 200

- reflex coronary vasodilation, 175

- regional differences in myocardial performance in LV of dog, 191

- renin in coarctation hypertension, 615

- sequence of retrograde atrial activation, 156

- ST segment voltage and gas tensions in ischemia, 455

- transmural flow during coronary dilation, 111

- ventricular intramural and epicardial potential distributions, 243

- visceromotor organization within descending spinal sympathetic pathways, 209

frogs

- potassium influx in frog atrium during cardiac cycle, 597

goats

- AV conduction of premature beats, 48

guinea pigs

- cyclic nucleotide effects on ventricles, 309

- effects of calcium and sodium on depolarization-induced automaticity in papillary muscle, 118

- effects of lidocaine and quinidine on steady-state characteristics of (dV/dt)_{max}, 20

hamsters

- effects of potassium ion on microcirculation, 325

- norepinephrine turnover in heart and spleen of cardiomyopathic Syrian hamsters, 855

monkeys

- in vivo determination of cerebral blood volume with radioactive oxygen-15, 707

pigs

- precordial and epicardial electrograms, 471

- sleep and arrhythmias, 342

rabbits

- angiotensin II antibodies and renin-angiotensin system, 607

- aortic afferent heart rate control, 41

- changes in arteries veins after induction of hypertension by coarctation of abdominal aorta, 183

- effect of sympathetic denervation on smooth muscle cell proliferation in growing rabbit ear artery, 14

- glycoside inotropy in absence of increase in potassium efflux, 390

- hormone interactions in isolated, 802

- increase in adrenergic nerve function in blood vessels from hypertensive, 503
 influence of potassium ions and osmolality on resting membrane potential of papillary muscle, 621
 prostaglandins in reversal of one-kidney hypertension, 683
 renin system in one-kidney hypertension, 715
 sinatrial transmission and atrial invasion during normal rhythm, 414
- rats**
 acute renal failure following temporary renal ischemia, 558
 adrenergic mechanisms in development of DOCA-saline hypertension in rats, 569
 angiotensin II antibodies and renin-angiotensin system, 607
 arterial hypertension from lesions of anterior hypothalamus, 226
 brain lesions and hypertension, 226
 control of aldosterone secretion in SH rats and normotensive Kyoto Wistar rats, 66
 effect of angiotensin II blocker 1-Sar-8-Ala-angiotensin II on renal artery clip hypertension, 640
 effects of coronary blood flow, glycolytic flux and intracellular pH, 733
 effects of norepinephrine and angiotensin II on renal function, 101
 glomerular filtration response to elevated ureteral pressure, 819
 hypotensive effect of clonidine during sodium depletion in rats, 795
 7-Ile-angiotensin III blockade of aldosterone synthesis, 350
 ion transport and DOCA hypertension, 333

 - effect of norepinephrine and fluid administration in dogs, 80
 - estimation of extravascular lung water by indicator-dilution techniques, 137
 - increased sheep lung vascular permeability caused by histamine, 547
 - lung tissue fluid balance, 271
- Pulmonary mechanics**
 - effect of surface tension on stability of lung, 497
 - lung stress, deformation, and atelectasis, 481
- Pulmonary receptors**
 - reflex control of muscle and renal flow, 200
- Pulmonary vascular bed**
 - bronchopulmonary arterial shunting and, 285
 - pressure-flow and pressure-volume relations determined by two-port analysis in dogs, 809
- Pulsatile flow**
 - analysis of coronary flow fields in thoracotomized dogs, 752
- Purkinje fibers**
 - effect of lidocaine on early inward transient current on, 630
 - electrophysiological actions of disopyramide phosphate on, 844

Q

- Quinidine**
 - effects on steady-state characteristics of $(dV/dt)_{max}$, 20

Circulation Research, Vol. 37, December 1975

R

- Radioactive tracers**
 - in vivo determination of cerebral blood volume with oxygen-15, 707
 - potassium influx in frog atrium during cardiac cycle, 597
- Radioiodinated soluble canine fibrin**
 - as thrombus localizing agent, 35
- Reactive hyperemia**
 - characteristics of myocardial, 263
 - transmural flow during coronary dilation, 111
- Receptors**
 - reflex coronary vasodilation elicited from cardiac receptors, 175
 - role of cardiac, pulmonary, and carotid mechanoreceptors in control of hind-limb and renal circulation, 200
- Reflex bradycardia**
 - aortic afferent heart rate control, 41
 - reflex coronary vasodilation, 175
- Reflexes**
 - influence of cardiopulmonary afferents on carotid reflexes, 422
- Refractory period**
 - AV conduction of premature beats in goats, 48
 - cardiac potential distributions for ectopic beats, 830
 - electrophysiological actions of disopyramide phosphate on canine ventricular muscle and Purkinje fibers, 844
 - interaction of sequential stimuli, 534
- Renal artery**
 - baroreceptor reflex control of arterial hemodynamics, 772
- Renal blood flow**
 - des-1-Asp-angiotensin II; intrarenal action, 30
 - disappearance of bradykinin, 59
 - effects of norepinephrine and angiotensin II on renal function, 101
 - glomerular filtration response to elevated ureteral pressure, 819
 - reflex control of muscle and renal flow, 200
- Renal failure**
 - pathogenesis of, following temporary renal ischemia in rat, 558
- Renal involvement**
 - angiotensin II antibodies and renin-angiotensin system, 607
 - disappearance of bradykinin in renal circulation of dogs, 59
 - effects of furosemide on renin secretion, 464
 - effects of norepinephrine and angiotensin II on renal function, 101
 - hypotensive effect of clonidine during sodium depletion in rats, 795
 - pathogenesis of acute renal failure following temporary renal ischemia in rats, 558
 - reflex control of muscle and renal flow, 200
 - renin in coarctation hypertension, 615
- Renin**
 - chronic one-kidney hypertension in rabbits, 715
 - des-1-Asp-angiotensin II: intrarenal action, 30
 - effects of furosemide on renin secretion, 464
 - vascular angiotensin II receptors and sodium balance in rats, 96
- Renin-angiotensin-aldosterone system**
 - abnormalities of renal perfusion and renal pressor system in coarctation hypertension, 615
 - active and passive immunization against angiotensin II in rat and rabbit, 607
 - chronic one-kidney hypertension in rabbits; treatment with kidney extracts, 715
 - control of aldosterone secretion in SH rats, 66
 - des-1-Asp-angiotensin II: possible intrarenal role in homeostasis in dogs, 30
 - hypotensive effect of clonidine during sodium depletion in rats, 795
 - 7-Ile-angiotensin III blockade of aldosterone synthesis, 350
 - 1-Sar-8-Ala-angiotensin II and renal artery clip hypertension in rats, 640
- Renin reactivity**
 - in coarctation hypertension, 615
- Renin release**
 - direct beta-adrenergic stimulation by rat kidney slice in vitro, 318

Repolarization

- analysis of ventricular activation and repolarization from potential distributions of ectopic beats, 830
- ventricular intramural potential distributions, 243

Respiratory acidosis

- glycoside inotropy and potassium efflux, 390
- influence of hematocrit, blood gas tensions, and pH on pressure-flow relations in isolated canine lung, 588

RO 2-2985 (X-537A)

- effects on regional blood flow and myocardial function, 215

S**Saphenous vein**

- elastic properties, 509

Sarcolemma

- ultrastructure of myocardial, 1

Sarcomere length-tension relations

- in living rat papillary muscle, 299

Septal artery

- effects of neurotransmitters on automaticity of AV junctional area, 146

Shear stress

- analysis of coronary flow fields in thoracotomized dogs, 752
- effect of spatial variations on diffusion at wall of arterial branch, 446

Shock

- effects of RO 2-2985 (X-537A) in awake dogs, 215

Sinoatrial node

- AV rhythm and neurotransmitters, 146

Sinoatrial transmission

- and atrial invasion during normal rhythm in rabbit heart, 414

Sleep stage

- regulation of ventricular arrhythmias in pigs, 342

Smooth muscle

- baroreceptor reflex control of arterial hemodynamics, 772
- calcium-accumulating properties in vascular smooth muscle, 580
- effect of sympathetic denervation on smooth muscle cell proliferation in rabbit ear artery, 14
- mechanism of action of potassium, 325

Sodium

- adrenergic mechanisms in development of DOCA-saline hypertension in rats, 569
- capillary permeability to myocardial sodium, 359
- des-1-Asp-angiotensin II: intrarenal action, 30
- disappearance of bradykinin in renal circulation of dogs, 59
- effects of calcium and, on depolarization-induced automaticity in guinea pig papillary muscle, 118
- hypotensive effect of clonidine during sodium depletion in rats, 795
- 7-Ile-angiotensin III blockade of aldosterone synthesis, 350
- renin in coarctation hypertension, 615
- vascular angiotensin II receptors and sodium balance in rats, 96

Spectrometers

- ST segment voltage and gas tensions in myocardial ischemia, 455

Spinal cord

- visceromotor organization within descending spinal sympathetic pathways in dogs, 209

Spleen

- norepinephrine turnover in heart and spleen of cardiomyopathic Syrian hamster, 855

SQ-20881

- cardiac biosynthesis of angiotensin II blocked by, 802

ST segment

- changes in intramyocardial ST segment voltage and gas tensions with regional myocardial ischemia, 455
- precordial and epicardial electrograms, 471

Steady-state relationships

- effect of lidocaine and quinidine on recovery kinetics of $(dV/dt)_{max}$ in guinea pig ventricular myocardium, 20

Stiffness indexes

- muscle stiffness determined from canine LV pressure-volume curves, 787

Stress-strain relationships

- and deformation, and atelectasis of the lung, 481
- muscle stiffness determined from canine LV pressure-volume

curves, 787

Subendocardial ischemia

- transmural flow during coronary dilation, 111

Sympathetic nervous system

- and effects of decreasing arterial blood pressure on CBF in baboons, 550
- hypotensive effect of clonidine during sodium depletion in rats, 795
- norepinephrine turnover in heart and spleen of cardiomyopathic Syrian hamster, 855
- visceromotor organization within descending spinal sympathetic pathways in dogs, 209

Sympathetic stimulation

- alpha-receptor coronary vasoconstriction and control of myocardial oxygen tension, 88
- effects of furosemide on renin secretion, 464

T**T wave**

- heart potential distributions for ectopic beats, 830

Tetrodotoxin

- effects of calcium and sodium on ventricular automaticity, 118

Thrombus

- radioiodinated soluble canine fibrin as localizing agent, 35

Tissue metabolites

- coronary blood flow, glycolytic flux and pH, 133

TQ and ST segments

- precordial and epicardial electrograms, 471

Trabecula, atrial

- atrial and ventricular muscle mechanics, 762

Transmembrane tracer flow

- potassium influx in frog atrium during cardiac cycle, 597

Transplantation

- elastic properties of normal and arterialized venous tissue, 509

Two-port analysis techniques

- pressure-flow and pressure-volume relations in pulmonary vascular bed of dog determined by, 809

U**Ultrasound**

- regional differences in myocardial performance in LV of dog, 191

Ultrastructure

- of myocardial sarcolemma, 1

Umbilical arteries

- intimal ultrastructure, 521

Uretral pressure

- glomerular filtration response in both hydropenic and plasma-expanded rat, 819

V**Vascular pressure**

- effect of increased, on lung tissue fluid balance in sheep, 271

Vascular responsiveness

- prostaglandins and microvascular responsiveness, 430

Vascular smooth muscle

- baroreceptor reflex control of arterial hemodynamics, 772
- calcium accumulation in, 580
- effect of sympathetic denervation on smooth muscle cell proliferation in rabbit ear artery, 14
- mechanism of action of potassium, 325

Vasoactive substance

- in modulation of coronary blood flow, 802

Vasoconstriction

- control of myocardial oxygen tension by sympathetic coronary vasoconstriction in dogs, 88

- effect of norepinephrine and fluid administration on pulmonary extravascular water volume, 80

Vasoconstrictors

- effects of norepinephrine and angiotensin II on renal function, 101
- influence of carotid baroreceptors on vascular responses to carotid chemoreceptor stimulation, 396
- prostaglandins and microvascular responsiveness, 430

Vasodilator mechanisms

- effects of furosemide on renin secretion, 464
- glomerular filtration response to elevated ureteral pressure, 819
- prostaglandins and microvascular responsiveness, 430
- prostaglandins in reversal of one-kidney hypertension in rabbit, 683
- reflex coronary dilation, 664
- reflex parasympathetic coronary vasodilation elicited from cardiac receptors, 175
- synthesis and coronary vasomotor effects of prostaglandins, angiotensin, and bradykinin, 802

Veins

- elastic properties of normal and arterialized venous tissue in dogs and man, 509

Ventricles

- cardiac metabolism without coronary flow, 438
- comparison of contractile performance of canine atrial and ventricular muscles, 762
- depolarization-induced automaticity in ventricular fibers, 118
- electrophysiological actions of disopyramide phosphate on canine Purkinje fibers and ventricular muscle, 664

Ventricular fibers

- effects of drugs on $(dV/dt)_{max}$, 20

Ventricular fibrillation

- interaction of sequential stimuli applied during relative refractory period and threshold of, 534
- sleep-stage regulation of ventricular arrhythmias in pigs, 342

Veratridine

- reflex parasympathetic coronary vasodilation elicited from cardiac receptors in dogs, 175

Viscosity of blood

- perfusate characteristics and pressure-flow relations, 588

Voltage clamp technique

- and cardiac electrophysiology, 403
- effect of lidocaine on early inward transient current in sheep Purkinje fibers, 630
- limitations, 403
- sucrose gap method, 674

Volume loading

- reduced baroreflex sensitivity and, 236

W**Wall of arteries**

- effect of shear on diffusion at wall of arterial branch, 446

Water, extravascular lung

- effect of exercise on CO diffusing capacity and dilution estimates of, 379
- effect of increased vascular pressure on lung tissue fluid balance in sheep, 271
- measurement by indicator-dilution techniques, 137

X**Xenon clearance methods**

- cerebral autoregulation and sympathectomy, 550

SUPPLEMENTS TO CIRCULATION RESEARCH
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Volumes 36 and 37

January-December
1975

VOL. XXXIII: HYPERTENSION RESEARCH, 1974—CLINICAL AND EXPERIMENTAL

Foreword. Norman M. Kaplan	I-1
Evidence for a New Mineralocorticoid in Patients with Low-Renin Essential Hypertension. Jordan A. Sennett, Ronald D. Brown, Donald P. Island, Larry R. Yarbro, J. Throck Watson, Paul E. Slaton, John W. Hollifield, and Grant W. Liddle	I-2
"Prorenin" in Human Plasma?: Methodological and Physiological Implications. Jean E. Sealey, and John H. Larah	I-10
Evidence for the Existence of an Acetone Soluble Renin Inhibiting Factor in Normal Human Plasma. Theodore A. Kotchen, Ramesh T. Talwalker, Jane M. Kotchen, Martha C. Miller, and William J. Welch	I-17
A Circulating Renin Activator in Essential Hypertension. Mohinder P. Sambhi, Peter Eggena, Jack D. Barrett, Michael Tuck, Charles E. Wiedeman, and Chalempol Thananopavarn	I-28
Angiotensin III: (Des-Aspartic Acid ¹)-Angiotensin II: Evidence and Speculation for its Role as an Important Agonist in the Renin-Angiotensin System. Theodore L. Goodfriend and Michael J. Peach	I-38
Effect of Prolonged Low-Dose Angiotensin II Infusion on the Sensitivity of Adrenal Cortex in Man. Wolfgang Oelkers, Manfred Schöneschöfer, George Schultze, Jehoiada J. Brown, Robert Fraser, James J. Morton, Anthony F. Lever, and J. Ian S. Robertson	I-49
Role of Angiotensin II and Potassium in the Long-term Regulation of Aldosterone Secretion in Intact Conscious Dogs. Robert E. McCaa, Connie S. McCaa, and Arthur C. Guyton	I-57
Possible Contributions of Endogenous Prostaglandins to the Control of Blood Pressure. John R. Vane and John C. McGiff	I-68
Prostaglandin Synthesis by Bovine Mesenteric Arteries and Veins. D. Alicia Terragno, K. Crowshaw, N. A. Terragno, and John C. McGiff	I-76
Renal Prostaglandin Synthesis in the Goldblatt Hypertensive Rat. David J. Pugsley, Lawrence J. Beilin, and Richard Peto	I-81
Influence of the Renin-Angiotensin System on the Effect of Prostaglandin Synthesis Inhibitors in the Renal Vasculature. Susumu Satoh and Ben G. Zimmerman	I-89
Dopamine Induced Relaxation of Isolated Canine Renal, Mesenteric, and Femoral Arteries Contracted with Prostaglandin F _{2α} . Leon I. Goldberg and Noboru Toda	I-97
Urinary Kallikrein Excretion in Spontaneously Hypertensive Rats. Ronald G. Geller, Harry S. Margolius, John J. Pisano, and Harry R. Keiser	I-103
Regulation of Glomerular Filtration and Proximal Tubule Reabsorption. Franklyn G. Knox, Jean-Louis Cuche, Cobern E. Ott, Jose A. Diaz-Buxo, and Gary Marchand	I-107
Role of the Collecting Duct in the Regulation of Sodium Balance. Jay H. Stein, Michael A. Kirschenbaum, William H. Bay, Richard W. Osgood, and Thomas F. Ferris	I-119
Identification of Angiotensinogenic Hypertension in Man Using 1-Sar-8-Ala-Angiotensin II (Saralasin, P-113). David H. P. Streeten, J. Michael Freiberg, Gunnar H. Anderson, and T. G. Dalakos	I-125

Malignant Hypertension due to Musculo-Mucoid Intimal Hyperplasia of Intrarenal Arteries: Absence of Renal Fibrinoid Necrosis. James A. Pitcock, James G. Johnson, Leonard Share, Fred E. Hatch, Jr., Sergio R. Acchiardo, William D. Black, and E. E. Muirhead	I-132
Blood Pressure Regulation in End-Stage Renal Disease and Anephric Man. Gaddo Onesti, Kwan E. Kim, James A. Greco, Edmund T. del Guercio, Michael Fernandes, and Charles Swartz	I-145
Changes in Renin, Water Balance, and Sodium Balance During Development of High Blood Pressure in Genetically Hypertensive Rats. Giuseppe Bianchi, P. G. Baer, Umberto Fox, Liliana Duzzi, Donata Pagetti, and A. M. Giovannetti	I-153
Effect of Varying Perfusion Pressures on the Output of Sodium and Renin and the Vascular Resistance in Kidneys of Rats with "Post-Salt" Hypertension and Kyoto Spontaneous Hypertension. Louis Tobian, Mary Ann Johnson, Judy Lange, and Susan Magraw	I-162
Development and Maintenance of Renal Hypertension in Normal and Guanethidine Sympathectomized Rats. James R. Douglas, Jr., Eugene M. Johnson, Jr., Garland R. Marshall, Jennifer Heist, Boyd K. Hartman, and Philip Needleman	I-171
Plasma Renin and Sodium Balance During Development of Moderate and Severe Renal Hypertension in Rats. Frans H. H. Leenen, and Wybren de Jong	I-179
Role of Renin in the Pathogenesis of Renal Hypertension. Om P. Gulati, Oscar A. Carretero, Narendra B. Oza, Leonardo A. Fernandez, and Anthony Schork	I-187
Effects of High and Low Sodium Intake on Arterial Pressure and Forearm Vascular Resistance in Borderline Hypertension. Allyn L. Mark, William J. Lawton, Francois M. Abboud, Annette E. Fitz, William E. Conner, and Donald D. Heistad	I-194
Altered Cardiac Responsiveness and Regulation in the Normal Cardiac Output Type of Borderline Hypertension. Stevo Julius, Otelio S. Randall, Murray D. Esler, Tomoyoshi Kashima, Charles Ellis, and Jane Bennett	I-199
Venous Smooth Muscle in Hypertension: Enhanced Contractility of Portal Veins from Spontaneously Hypertensive Rats. Stanley Greenberg and David F. Bohr ...	I-208
Mechanism of Vascular Hyperresponsiveness in the Spontaneously Hypertensive Rat. Lyman T. Lais and Michael J. Brody	I-216
Cardiovascular Regulation by Central Adrenergic Mechanisms and Its Alteration by Hypotensive Drugs. G. Haeusler	I-223
Pharmacological Effects of Alpha-Metha-dopa, Alpha-Methylnorepinephrine, and Octopamine on Rat Arteriolar, Arterial, and Terminal Vascular Smooth Muscle. Burton M. Altura	I-233
Association Between Renin and Arterial Pressure Responses to Beta-Adrenergic Blockade in Human Essential Hypertension. Emmanuel L. Bravo, Robert C. Tarazi, Harriet P. Dustan, and James W. Lewis	I-241
Effect of Salt Depletion and Propranolol on Blood Pressure and Plasma Renin Activity in Various Forms of Hypertension. G. G. Geyskes, P. Boer, J. Vos, F. H. H. Leenen, and E. J. Dorhout Mees	I-248
Partial Versus Complete Control of Blood Pressure in the Prevention of Hypertensive Complications. James Taguchi and Edward D. Freis	I-257

A NOTE ON PAGE NUMBERS

SUPPLEMENT NUMBER ONE CIRCULATION RESEARCH, 1976 includes pages I-1 through I-260 to facilitate indexing. A subject index for all 1975 supplements to CIRCULATION RESEARCH (referring to pages as I-100, or III-100, etc.) is published with December CIRCULATION RESEARCH. Supplements are arranged for binding in a separate volume entitled "SUPPLEMENTS TO CIRCULATION RESEARCH, VOLS. 36 and 37 1975"

SUPPLEMENT SUBJECT INDEX

Circulation Research

VOLUMES 36 AND 37

JANUARY-DECEMBER 1975

A

- Acetone soluble renin inhibiting factor**
in normal human plasma, I-17
- Acid mucopolysaccharide**
malignant hypertension due to musculomucoid intimal hyperplasia, I-133
- ACTH**
effect of angiotensin II on adrenal cortex, I-49
- Adrenal cortex**
angiotensin III (des-asp¹)-angiotensin II: role as agonist in renin-angiotensin system, I-38
effect of prolonged low-dose angiotensin II on, I-49
role of angiotensin II and potassium on aldosterone secretion, I-57
- Adrenal glands**
new mineralocorticoid in low-renin essential hypertension, I-2
- Adrenergic system**
cardiovascular regulation by central adrenergic mechanisms and its alteration by hypotensive drugs, I-223
- Albumin**
role of collecting duct in regulation of sodium balance, I-119
- Aldosterone**
role of angiotensin II and potassium in regulation of aldosterone secretion in dogs, I-57
See also Renin-angiotensin-aldosterone system
- Alpha-methyldopa**
mechanism of action, I-233
- Alpha-methylnorepinephrine**
mechanism of action, I-233
- Aminoglutethimide**
treatment with, I-2
- Angiotensin**
angiotensin III (des-aspartic acid)-angiotensin II: role as agonist in renin-angiotensin system, I-38
circulating renin activator in essential hypertension, I-28
1-Sar-8-Ala-angiotensin II (P-113) for identifying angiotensinogenic hypertension, I-125
See also Renin-angiotensin-aldosterone system
- Angiotensin II**
effect of prolonged low-dose infusion on sensitivity of adrenal cortex, I-49
role of potassium and, in regulation of aldosterone secretion in dogs, I-57
- Angiotensin inhibitors**
angiotensin III (des-aspartic acid)-angiotensin II: role as agonist in renin-angiotensin system, I-38
- Angiotensinogen**
circulating renin activator in essential hypertension, I-28
- Animal studies**
 - cats**
cardiovascular regulation by central adrenergic mechanisms, I-223
 - cows**
prostaglandin synthesis by bovine mesenteric arteries and veins, I-76
 - dogs**
angiotensin II and potassium and regulation of aldosterone secretion, I-57
regulation of glomerular filtration and proximal tubule reabsorption, I-107
 - rats**
changes in renin, water and sodium balance during development of high blood pressure, I-153
contractility of portal veins from SH rats, I-208
effect of varying perfusion pressures on output of sodium and renin and vascular resistance in "post-salt" and Kyoto hypertensive rats, I-162
mechanism of vascular hyperresponsiveness in SH rat, new mineralocorticoid in low-renin essential hypertension, I-2
pharmacological effects of alpha-methyldopa, alpha-

- methylnorepinephrine, and octopamine on vascular smooth muscle, I-233
- plasma renin and sodium balance during development of renal hypertension, I-179
- prostaglandin synthesis in Goldblatt hypertensive rat, I-81
- regulation of glomerular filtration and proximal tubule reabsorption, I-107
- renal hypertension in normal and guanethidine sympathectomized rats, I-173
- role of renin in pathogenesis of renal hypertension, I-187
- urinary kallikrein excretion in SHR and Wistar/Kyoto rats, I-103
- Apomorphine**
dopamine induced relaxation of isolated arteries, I-97
- Arachidonic acid**
prostaglandin synthesis by bovine mesenteric blood vessels, I-76
- Arteriolar hyalinization**
malignant hypertension due to musculomucoid intimal hyperplasia, I-133
- Arterioles**
pharmacological effects of alpha-methyldopa, alpha-methylnorepinephrine, and octopamine, I-233
- Atropine**
altered cardiac responsiveness in normal cardiac output type of borderline hypertension, I-199
- Autonomic control of the heart**
in normal cardiac output type of borderline hypertension, I-199
- Autoregulation**
of glomerular filtration, I-107

B

- Barium**
vascular hyperresponsiveness in SH rat, I-216
venous smooth muscle in hypertension, I-208
- Baroreceptor reflex**
cardiovascular regulation by central adrenergic mechanisms, I-223
- Beta-adrenergic blockade**
PRA and arterial pressure responses to, in essential hypertension, I-241
- Black population**
malignant hypertension due to musculomucoid intimal hyperplasia of intrarenal arteries, I-133
- Blood flow**
autoregulation of renal, I-68
- Blood pressure**
angiotensin II and potassium in regulation of aldosterone secretion, I-57
changes in renin, water balance, and sodium balance during development of high blood pressure in MHS rats, I-153
effect of prolonged low-dose angiotensin II on adrenal cortex, I-49
effect of salt depletion and propranolol on PRA and, in hypertension, I-248
effect of sodium intake on forearm vascular resistance and, in borderline hypertension, I-194
partial vs. complete control in prevention of hypertensive complications, I-257
and PRA responses to beta-adrenergic blockade in essential hypertension, I-241
plasma renin and sodium balance during development of renal hypertension, I-179
prostaglandin synthesis in Goldblatt hypertensive rat, I-81
prostaglandins and control of, I-68
regulation in end-stage renal disease and anephric man, I-145
- Blood volume**
altered cardiac responsiveness in normal cardiac output type of borderline hypertension, I-199

Body fluid expansion

blood pressure regulation in end-stage renal disease, I-145

Bradykinin

prostaglandin synthesis by bovine mesenteric blood vessels, I-76

prostaglandins and control of blood pressure, I-68

Bromide distribution volume

effect of salt depletion and propranolol on blood pressure and PRA in hypertension, I-248

Bulboacapsine

dopamine induced relaxation of isolated arteries, I-97

C**Calcium**

venous smooth muscle in hypertension, I-208

Cardiac output

blood pressure regulation in end-stage renal disease, I-145

Catecholamines

pharmacological effects of alpha-methyldopa, alpha-methylnorepinephrine and octopamine on vascular smooth muscle, I-233

venous smooth muscle in hypertension, I-208

Chlorpromazine

dopamine induced relaxation of isolated arteries, I-97

Clonidine

cardiovascular regulation by central adrenergic mechanisms, I-223

Cortisol

angiotensin II and potassium in regulation of aldosterone secretion, I-57

effect of angiotensin II on adrenal cortex, I-49

D**Diuretics**

effect of salt depletion and propranolol on blood pressure and PRA in hypertension, I-248

renin and arterial pressure responses to propranolol administration, I-241

DOCA (deoxycorticosterone acetate)-salt rats

role of collecting duct in regulation of sodium balance, I-119

Dopamine

induced relaxation of isolated arteries contracted with prostaglandins, I-97

E**Electron-capture detection**

renal prostaglandin synthesis in Goldblatt hypertensive rat, I-81

Electron microscopy

malignant hypertension due to musculomucoid intimal hyperplasia, I-133

Epinine

dopamine induced relaxation of isolated arteries, I-97

Extracellular fluid volume

effect of perfusion pressures on sodium, renin, and vascular resistance in rat kidneys, I-162

role of collecting duct in regulation of sodium balance, I-119

F**Femoral arteries**

dopamine induced relaxation of isolated arteries contracted with prostaglandins, I-97

Fluid volume, extracellular

effect of perfusion pressures on sodium, renin, and vascular resistance in rat kidney, I-162

role of collecting duct in regulation of sodium balance, I-119

Forearm vascular resistance

effects of sodium intake on arterial pressure and, in borderline hypertension, I-194

G**Gas-liquid chromatography**

prostaglandin synthesis in Goldblatt hypertensive rat, I-81

Glomerular filtration

autoregulation, I-107

regulation of, and proximal tubule reabsorption, I-107

Glomeruli, ischemic

malignant hypertension due to musculomucoid intimal hyperplasia, I-133

Goldblatt hypertension in the primate

circulating renin activator in essential hypertension, I-28

Guanethidine

renal hypertension in normal and guanethidine sympathectomized rats, I-173

H**Haloperidol**

dopamine induced relaxation of isolated arteries, I-97

Hemodialysis

blood pressure regulation in end-stage renal disease, I-145

Hemodynamics

altered cardiac responsiveness in normal cardiac output type of borderline hypertension, I-199

effects of sodium intake on arterial pressure and forearm vascular resistance in hypertension, I-194

vascular hyperresponsiveness in SH rat, I-216

16 β -hydroxydehydroepiandrosterone (16 β -OH-DHEA)

evidence for new mineralocorticoid in low-renin essential hypertension, I-2

specific assay for, I-2

Hyperemia, reactive

prostaglandins and control of blood pressure, I-68

Hyperplasia

malignant hypertension due to musculo-mucoid intimal hyperplasia of intrarenal arteries, I-133

Hypersensitivity

vascular hyperresponsiveness in SH rat, I-216

Hypertension

acetone soluble renin inhibiting factor in normal human plasma, I-17

angiotensinogenic, I-125

blood pressure regulation in end-stage renal disease and anephric man, I-145

borderline

altered cardiac responsiveness in normal cardiac output type, I-199

effects of sodium intake on arterial pressure and forearm vascular resistance, I-194

cardiovascular regulation by central adrenergic mechanisms, I-223

changes in renin, water and sodium balance during development of high blood pressure, I-153

effect of salt depletion and propranolol on blood pressure and PRA in various forms of, I-248

essential

circulating renin activator in, I-28

relationship between PRA and arterial pressure responses to beta-adrenergic blockade, I-241

identification of angiotensinogenic hypertension using 1-Sar-8-Ala-angiotensin II (saralasin, P-113), I-125

low-renin essential

evidence for new mineralocorticoid in patients with, I-2

secretion of "prorenin" in response to sodium depletion, I-10

severe essential

malignant hypertension due to musculomucoid intimal hyperplasia of intrarenal arteries, I-133

partial vs. complete control of blood pressure in prevention of complications, I-257

prostaglandins and control of blood pressure, I-68

renal

in normal and guanethidine sympathectomized rats, I-171

plasma renin and sodium balance during development of, I-179

role of renin in pathogenesis of, I-187

"resetting" hypothesis, I-162

vascular hyperresponsiveness in SH rats, I-216

venous smooth muscle in, I-208

Hypothalamus stimulation

central adrenergic neurons and pressor responses to, I-223

I**Indomethacin**

effect of prostaglandin inhibitors on renal vasculature, I-89

- prostaglandin synthesis in Goldblatt hypertensive rat, I-81
 prostaglandins and control of blood pressure, I-68
Isoproterenol
 altered cardiac responsiveness in normal cardiac output type
 of borderline hypertension, I-199

K

- Kallikrein esterase activity**
 urinary kallikrein excretion in SHR, I-103
Kidneys
 blood pressure regulation in end-stage renal disease, I-145
 changes in renin, water and sodium balance during develop-
 ment of high blood pressure in MHS rats, I-153
 effect of perfusion pressures on sodium, renin and vascular
 resistance in kidneys of rats, I-162
 malignant hypertension due to musculomucoid intimal hy-
 perplasia of intrarenal arteries, I-133
 prostaglandin synthesis in Goldblatt hypertensive rat, I-81
 regulation of glomerular filtration and proximal tubule reab-
 sorption, I-107
 role of collecting duct in regulation of sodium balance, I-119
 role of renin in pathogenesis of renal hypertension, I-187

L

- Loop of Henle**
 role of collecting duct in regulation of sodium balance, I-119
Low-renin essential hypertension
 evidence of new mineralocorticoid in, I-2
 "prorenin" in human plasma, I-10

M

- Magnesium**
 effect of angiotensin II on adrenal cortex, I-49
Meclofenamate
 effect of prostaglandin inhibitors on renal vasculature, I-89
 prostaglandin synthesis by bovine mesenteric blood vessels,
 I-76
Menstrual cycle
 abnormal fluid retention, I-2
Mesenteric arteries
 dopamine induced relaxation of isolated arteries contracted
 with prostaglandins, I-97
 prostaglandin synthesis by bovine mesenteric veins and, I-76
3-Methoxythramine
 dopamine induced relaxation of isolated arteries, I-97
Mineralocorticoids
 in low-renin essential hypertension, I-2
Musculo-mucoid intimal hyperplasia
 malignant hypertension due to, I-133

N

- Natriuresis**
 role of collecting duct in regulation of sodium balance, I-119
Nephrectomy
 blood pressure regulation in end-stage renal disease, I-145
Nephron, distal
 role of collecting duct in regulation of sodium balance, I-119
Nephrosclerosis
 effect of perfusion pressures on sodium, renin and vascular
 resistance in kidneys of rats, I-162
Norepinephrine
 effects of sodium intake on arterial pressure and forearm
 vascular resistance in borderline hypertension, I-194
 prostaglandins and control of blood pressure, I-68
 vascular hyperresponsiveness in SH rat, I-216

O

- Octopamine**
 mechanism of action, I-233
16- β -OH-DHEA
 evidence for new mineralocorticoid in low-renin essential
 hypertension, I-2

P

- P-133**
 identification of angiotensinogenic hypertension, I-125
Papaverine
 dopamine induced relaxation of isolated arteries, I-97
Parathyroid hormone
 regulation of glomerular filtration and proximal tubule reab-
 sorption, I-107
Perfusion pressures
 effect on output of sodium and renin and vascular resistance
 in kidneys of rats, I-162
Phenoxybenzamine
 dopamine induced relaxation of isolated arteries, I-97
Phospholipids
 angiotensin III: role as agonist in renin-angiotensin system,
 I-38
Plasma
 evidence of acetone soluble renin inhibiting factor in normal
 human plasma, I-17
 "prorenin" in human plasma: methodological and physiologi-
 cal implications, I-10
Plasma renin activity
 and arterial pressure responses to beta-adrenergic blockade in
 essential hypertension, I-241
 changes after storage for twelve months or more, I-10
 circulating renin activator in essential hypertension, I-28
 effect of salt depletion and propranolol on blood pressure and
 PRA in hypertension, I-248
 existence of acetone soluble renin inhibiting factor in normal
 human plasma, I-17
 identification of angiotensinogenic hypertension, I-125
 "prorenin" in human plasma, I-10
 role of renin in pathogenesis of renal hypertension, I-187
 and sodium balance during development of renal hyperten-
 sion in rats, I-179
Portal veins
 enhanced contractility in, from SH rats, I-208
Potassium
 dopamine induced relaxation of isolated arteries, I-97
 effect of angiotensin II on adrenal cortex, I-49
 effects of sodium intake on arterial pressure and forearm
 vascular resistance in borderline hypertension, I-194
 role of angiotensin II and, in regulation of aldosterone
 secretion in dogs, I-57
Pregnancy
 abnormal fluid retention, I-2
Pressor hormones
 prostaglandins and control of blood pressure, I-68
Propranolol
 cardiac regulation in borderline hypertension with normal
 resting cardiac index, I-199
 dopamine induced relaxation of isolated arteries, I-97
 effect of salt depletion and propranolol on blood pressure and
 PRA in hypertension, I-248
 relationship between PRA and arterial pressure responses in
 essential hypertension, I-241
 renal hypertension in normal and guanethidine sympathecto-
 mized rats, I-171
"Prorenin"
 in human plasma, I-10
Prostaglandins
 contributions to control of blood pressure, I-68
 dopamine induced relaxation of isolated arteries contracted
 with prostaglandins, I-97
 regulation of glomerular filtration and proximal tubule reab-
 sorption, I-107
 role of collecting duct in regulation of sodium balance, I-119
 synthesis
 by bovine mesenteric arteries and veins, I-76
 in Goldblatt hypertensive rats, I-81
 influence of renin-angiotensin system on prostaglandin
 synthesis inhibitors in renal vasculature, I-89
 venous smooth muscle in hypertension, I-208
Proximal tubule
 regulation of glomerular filtration and proximal tubule reab-
 sorption, I-107

R

Radiochromatograms

prostaglandin synthesis by bovine mesenteric blood vessels, I-76

Reactive hyperemia

prostaglandins and control of blood pressure, I-68

Receptors

angiotensin III: role as agonist in renin-angiotensin system, I-38

Renal arteries

dopamine induced relaxation of isolated arteries contracted with prostaglandins, I-97
malignant hypertension due to musculomucoid intimal hyperplasia of, I-133

Renal blood flow

effect of perfusion pressures on sodium, renin and vascular resistance in rat kidneys, I-162
influence of renin-angiotensin system on prostaglandin synthesis inhibitors in renal vasculature, I-89

Renal involvement

blood pressure regulation in end-stage renal disease and anephric man, I-145
changes in renin, water balance, and sodium balance during development of high blood pressure in MHS rats, I-153
effect of varying perfusion pressures on the output of sodium and renin and vascular resistance in kidneys of rats, I-162
identification of angiotensinogenic hypertension by using I-Sar-8-Ala-angiotensin II (Saralasin, P-113), I-125
malignant hypertension due to musculomucoid intimal hyperplasia of intrarenal arteries, I-133
plasma renin and sodium balance during renal hypertension in rats, I-179
regulation of glomerular filtration and proximal tubule reabsorption, I-107
renal hypertension in normal and guanethidine sympathectomized rats, I-171
role of collecting duct in regulation of sodium balance, I-119
role of renin pathogenesis of renal hypertension, I-187

Renal ischemia

influence of renin-angiotensin system on effect of prostaglandin inhibitors in renal vasculature, I-89

Renal vein

identification of angiotensinogenic hypertension using I-Sar-8-Ala-angiotensin II, I-125

Renin

changes during development of high blood pressure in MHS rats, I-153
circulating renin activator in essential hypertension, I-28
effect of angiotensin II on adrenal cortex, I-49
effect of varying perfusion pressures on sodium, renin and vascular resistance in kidneys of rats, I-162
evidence for existence of acetone soluble renin inhibiting factor in human plasma, I-17
kinetics of renin reactions, I-28

Renin-angiotensin-aldosterone system

acetone soluble renin inhibiting factor in normal plasma, I-17
angiotensin III: role as an agonist, I-38
circulating renin activator in essential hypertension, I-28
effect of prolonged low-dose angiotensin II infusion on adrenal cortex, I-49
effects of sodium intake on arterial pressure and forearm vascular resistance in hypertension, I-194
evidence for new mineralocorticoid in low-renin essential hypertension, I-2
influence on prostaglandin synthesis inhibitors in renal vasculature, I-89
plasma renin and sodium balance during development of renal hypertension, I-179
"prorenin" in human plasma, I-10
prostaglandins and control of blood pressure, I-68
role of angiotensin II and potassium in regulation of aldosterone secretion in dogs, I-57

Renin assay

"prorenin" in human plasma, I-10

Renin reactivity

acetone soluble renin inhibiting factor in normal human plasma, I-17

Ringer solution

role of collecting duct in regulation of sodium balance, I-119

S

Salt and water loading

blood pressure regulation in end-stage renal disease, I-145

Saralasin

for identification of angiotensinogenic hypertension, I-125

Smooth muscle, vascular

hyperresponsiveness in SH rat, I-216
malignant hypertension due to musculomucoid intimal hyperplasia, I-133
pharmacological effects of alpha-methyldopa, alpha-methylnorepinephrine, and octopamine, I-233
venous smooth muscle in hypertension: enhanced contractility of portal veins from SHR, I-208

Sodium

angiotensin II and potassium in regulation of aldosterone secretion, I-57
balance
changes during development of high blood pressure in MHS rats, I-153
plasma renin and sodium balance during development of renal hypertension in rats, I-179
role of collecting duct in regulation of, I-119
effects of high and low sodium intake
on arterial pressure and forearm vascular resistance in borderline hypertension, I-194
urinary kallikrein excretion in SH rats, I-103
effects of long-term propranolol administration on PRA during rapid sodium depletion, I-241
effects of prolonged low-dose angiotensin II infusion on adrenal cortex, I-49
effects of salt depletion and propranolol on blood pressure and PRA in various forms of hypertension, I-248
effects of varying perfusion pressures on output of renin, vascular resistance in kidneys of rats, I-162
prostaglandins and control of blood pressure, I-68
regulation of glomerular filtration and proximal tubule reabsorption, I-107
secretion of "prorenin" in response to sodium depletion, I-10

Spironolactone

circulating renin activator in essential hypertension, I-28
new mineralocorticoid in low-renin essential hypertension, I-2

Steroids

new mineralocorticoid in low-renin essential hypertension, I-2

Strontium

venous smooth muscle in hypertension, I-208

Sympathetic nervous system

renal hypertension in normal and guanethidine sympathectomized rats, I-171

T

Testosterone

angiotensin III: role as agonist in renin-angiotensin system, I-38

Therapy

cardiovascular regulation by central adrenergic mechanisms and its alteration by hypotensive drugs, I-223
partial vs. complete control of blood pressure in prevention of hypertensive complications, I-257
pharmacological effects of alpha-methyldopa, alpha-methylnorepinephrine, and octopamine on vascular smooth muscle, I-223
renin and arterial pressure responses to propranolol administration, I-241

Thiazide therapy

circulating renin activator in essential hypertension, I-28

Transplantation, renal

blood pressure regulation in end-stage renal disease, I-145

Tubules

regulation of glomerular filtration and proximal tubule reabsorption, I-107
role of collecting duct in regulation of sodium balance, I-119

U

Uremia

acetone soluble renin inhibiting factor in plasma, I-17

Urinary electrolytes

new mineralocorticoid in low-renin essential hypertension, I-2

Urinary kallikrein excretion
in spontaneously hypertensive rats, I-103

V

Vascular reactivity
prostaglandin synthesis by bovine mesenteric blood vessels, I-76

Vascular resistance
hyperresponsiveness in SH rat, I-216

Vascular smooth muscle
hyperresponsiveness in SH rat, I-216
malignant hypertension due to musculomucoid intimal hyperplasia, I-133
pharmacological effects of alpha-methyl dopa, alpha-methylnorepinephrine, and octopamine, I-233
venous smooth muscle in hypertension; enhanced contractility of portal veins from SHR, I-208

Vasoconstriction
effects of sodium intake on arterial pressure and forearm vascular resistance, I-194
prostaglandins and control of blood pressure, I-68

Vasodilator mechanism
dopamine induced relaxation of isolated arteries contracted with prostaglandins, I-97
regulation of glomerular filtration and proximal tubule reabsorption, I-107

urinary kallikrein excretion in SH rats, I-103

Vasopressor substance
blood pressure regulation in end-stage renal disease, I-145

Venoconstriction
prostaglandin synthesis by bovine mesenteric blood vessels, I-76

Venous smooth muscle
in hypertension, I-208

W

Water balance
blood pressure regulation in end-stage renal disease, I-145
changes during development of high blood pressure in MHS rats, I-153
